

Python Engineer (Data & Cloud Platforms)

m/w/d, Zürich

For our client, we are looking for an experienced **Senior Python Developer** to build and operate scalable software solutions and data products in a cloud-native environment.

Your Responsibilities:

Software Development

- * Design, develop, and maintain scalable and reliable software solutions using **Python**
- * Take end-to-end ownership of features from requirements and design through deployment and production support
- * Develop and maintain **REST APIs, data pipelines, and cloud-native services**
- * Write clean, maintainable, testable, and high-quality code

Cloud & Operations

- * Deploy, monitor, and optimize applications on **Google Cloud Platform (GCP)**
- * Implement monitoring, alerting, observability, and data quality controls
- * Troubleshoot production issues and improve system stability, scalability, and performance

Collaboration & Architecture

- * Collaborate with product owners, data stewards, source system teams, and business stakeholders
- * Contribute to architectural decisions and continuous improvement
- * Support business-critical applications and data products

Your Profile:

- * Strong experience in **Python software development**
