

Senior Project Engineer

m/w/d, Schaffhausen

This role is responsible for managing a specific project, part of the Site Master Plan (SMP) project, working in collaboration with the overall project program lead to ensure project progress throughout the project lifecycle, with a heavy focus on Facility Construction, Commissioning and Qualification and Handover.

Key Responsibilities

- * Strategic Project Leadership & Delivery
- * Lead large capital projects across all project phases (planning, design, procurement, construction, commissioning).
- * Coordinate multi-functional engineering strategies to meet schedule, budget, quality, and regulatory requirements.
- * Technical Authority & Governance
- * Act as the senior technical authority, review and approve engineering design changes, and technical submittals.
- * Ensure engineering solutions align with J&J standards, industry codes, and regulatory expectations.
- * Budget & Cost Management
- * Lead multi-million-dollar capital budgets for assigned projects, monitor costs, and support procurement and contractor selection and evaluation.
- * Participate in contractor bid reviews and support value-engineering decisions.
- * Scheduling, Risk & Performance Management
- * Lead schedule development and integration with program timelines; identify critical path items and drive mitigation.
- * Maintain a proactive risk register, recommend mitigations, and track performance metrics.
- * Construction Management & Field Leadership
- * Provide senior owner-side engineering oversight during construction and commissioning; ensure contractor performance aligns with design intent and J&J EHS standards.
- * Promote a strong safety culture and ensure EHS compliance on site.
- * Documentation & Reporting

larissa.birkle@coop.ch

- * Maintain detailed engineering records, design documentation, and as-built information.
- * Prepare and present executive-level status updates, technical summaries, and risk briefings.

Your background

- * Bachelor's degree in Engineering, Architecture, or Construction Management required; Master's degree preferred.
- * 10+ years of experience leading capital projects, preferably in regulated industries (pharmaceutical, biotechnology, medical device, or similar).
- * Demonstrated owner-side engineering leadership and experience working with A&E and Construction Management firms.
- * Experience leading multi-discipline teams and collaborating with quality, EHS, operations, and external consultants.

Skills & Competencies

- * Strong technical judgment and problem-solving skills.
- * Excellent communication and leadership skills for multi-functional and executive interactions.
- * Proven track record to lead budgets, schedules, and complex contractor relationships.
- * Familiarity with regulatory expectations for facilities in regulated industries.
- * Proficiency with project management and engineering documentation tools.
