

Senior IT Project Manager

m/f/d, Solothurn

On behalf of our client, a leading company in the energy sector, we are seeking an experienced **Senior IT Project Manager** to join their IT Portfolio & Project Management function.

In this strategic transformation project, you will lead the implementation of a global solution for physical gas and power trading while driving the modernization of the existing technology landscape. You will help establish a scalable architecture and reduce operational risk by replacing complex legacy systems with a stable and specialized platform.

Your Responsibility:

- * Develop project charter and detailed delivery plan
- * Develop and manage project timelines and deliverables
- * Initiate project setup and manage through phase gates
- * Coordinate and deliver the project on time, within budget and in scope, owning the full project life cycle from initiation to delivery
- * Develop and manage the project communications plan
- * Develop, manage and report on project success criteria
- * Provide status reporting on all project dimensions to sponsors, steering committees & stakeholders
- * Stakeholder engagement and management
- * Manage project changes, risks, assumptions, issues and dependencies
- * Develop a sufficiently deep technical and business understanding to be able to interact with business and IT subject matter experts
- * Work closely with diverse teams and departments to deliver on IT solutions for business
- * Work closely with department heads and the PMO team to develop the project management system, guidelines, standards, KPIs and processes
- * Managing project compliance to our standards and processes
- * Plan and execute meetings and workshops with various stakeholders
