

Biospecimen Specialist - BioRepository Specialist

m/f/d, Zug

The Biospecimen Specialist will manage the end to end biorepository activities to fulfill our customer's specimen request in compliance with local regulatory requirements, quality, business, and industry best practices/standards.

Location: Rotkreuz

Duration: 12 months

The ideal candidate holds a degree in Life Sciences paired with practical experience handling biological specimens and using validated tools like LIMS. Exceptional attention to detail is critical for maintaining strict biospecimen traceability, data accuracy, and regulatory compliance. Driven and highly organized, this candidate thrives in a fast-paced environment while managing end-to-end sample acquisition and project timelines.

Responsibilities:

- * Manage and perform biological material processing, registration, shipment, returns, verification activities, retrievals, and inventory searches in a validated environment.
- * Take accountability for end-to-end project management and biorepository management activities to fulfill customer specimen requests.
