

Application Developer - Java/PHP

m/f/d, Basel-Landschaft

For our client in Basel-Landschaft, we are looking for an experienced and motivated **Application Developer - Java/PHP**.

This role involves developing and maintaining critical applications, ensuring seamless integration across systems, and supporting operational excellence.

Your Tasks:

- * Design, develop, and maintain applications using **Java** and **PHP**
- * Create and optimize **SQL queries** and database structures for high-performance systems
- * Develop and manage **APIs** for internal and external integrations
- * Administer and troubleshoot **Linux-based environments**
- * Collaborate with cross-functional teams to deliver robust IT solutions
- * Provide **on-call support** during agreed evenings and weekends to ensure system availability
- * Participate in code reviews, testing, and documentation processes

Your Profile:

- * Proven experience in **Java** and **PHP** development
- * Strong knowledge of **advanced SQL** and relational database design
- * Hands-on experience with **API development and integration**
- * Proficiency in **Linux OS administration**
- * Proficiency in DevOps & efficient pipeline management is a plus
- * Familiarity with cloud platforms and containerization (e.g., Docker, Kubernetes).
- * Ability to work independently and in a team environment
- * Excellent problem-solving and communication skills
