

Engineering Planner

m/f/d, Wallis

For our client, we are looking for an experienced Maintenance Planner / Scheduler who confidently coordinates maintenance and troubleshooting activities in a GMP-regulated environment, effectively collaborates with production and workshop teams, and brings strong expertise in maintenance planning, SAP PM, and resource coordination, in order to ensure reliable, compliant, and on-time execution of maintenance activities for facilities, utilities, and equipment.

Start date: 01.06.2026

End date: 31.10.2026

Workload:100%

Contract Type: Contracting

Location: Visp

Your Tasks:

- * Create and maintain maintenance schedules for facilities, utilities, and equipment
- * Ensure maintenance tasks are completed on time and escalate delays when required
- * Coordinate manpower, resources, and external contractors
- * Manage procurement and allocation of spare parts, materials, and consumables
- * Prepare KPI reports and maintenance performance reports
- * Ensure all maintenance activities are performed safely and in compliance with GMP requirements
- * Continuously improve planning and scheduling processes

Your Profile:

- * Technical or engineering qualification (HND/HNC or equivalent)
- * Experience in maintenance planning and engineering maintenance activities
- * Ideally experience in pharmaceutical, GMP, or highly regulated environments
- * Strong knowledge of maintenance planning and scheduling processes

Job profile

-  Life Sciences - Engineering
-  Wallis
-  Contracting
-  Full Time
-  asap - 31.10.2026
-  SAP, FUE
