

Project Manager/RTE &Scrum Master - AI- Driven Clinical Data Management (m/f/d) m/f/d, Basel-Stadt

For our client, we are looking for an experienced Program Delivery Manager / Scrum Master who confidently drives delivery roadmaps across multiple agile teams, coordinates cross-functional dependencies and releases, and brings strong expertise in agile methodologies, stakeholder management, and cross-team collaboration, in order to ensure transparent, efficient, and high-quality delivery of complex programs from MVP through multiple release cycles.

Start date: 01.07.2026

End date: 30.11.2027

Workload: 100% (up to 50% remote working possible)

Contract Type: Contracting

Location: Kaiseraugst

Your Tasks:

Program & Delivery Management

- * Own and drive delivery planning across multiple agile teams from MVP through subsequent releases
- * Manage cross-team dependencies, risks, and blockers to ensure smooth delivery execution
- * Lead release management activities, including release planning and coordination with Development, QA, and Operations
- * Ensure structured scope and requirements management processes
- * Provide transparent program status reporting to stakeholders and leadership

Scrum Master & Agile Coaching

- * Facilitate Scrum ceremonies for multiple delivery teams (Sprint Planning, Daily Stand-ups, Reviews, Retrospectives)

Job Profil

Edgar Lingert

Talent Acquisition Consultant

+41 61 633 30 64

edgar.lingert@coop.ch

- * Remove impediments and protect teams from external disruptions
- * Coach teams on agile best practices and continuous improvement
- * Support Product Owners with backlog refinement and story definition
- * Track and communicate key agile delivery metrics (velocity, burndown, blockers, etc.)

Cross-Team Coordination

- * Coordinate collaboration and alignment across multiple delivery teams
- * Facilitate Scrum of Scrums and dependency management sessions
- * Maintain Jira as the central source of truth and ensure consistent Jira governance across teams
- * Enable effective collaboration between onsite and distributed international teams
- * Coordinate with adjacent programs and platform teams on integration dependencies

Your Profile:

- * 7+ years of project management experience in software delivery, including 3+ years managing programmes with multiple parallel teams
- * Demonstrated Scrum Master experience - you have facilitated agile teams, not just observed them. You know how to run an effective retro and how to coach without directing
- * Pharmaceutical or Life Sciences industry experience with understanding of GxP requirements and what inspection readiness means in practice
- * Hands-on Jira experience - you have configured and managed Jira projects, not just consumed reports. Xray test management experience preferred
- * Experience with scaled agile delivery (SAFe or similar) *** and the pragmatism to know when to adapt the framework to the situation
- * Strong risk and dependency management skills with a bias toward action
- * Experience managing distributed hybrid teams across multiple time zones
- * Fluent English communication - written and verbal
