

Quality Assurance Engineer

m/f/d, Luzern

We are currently seeking a **Quality Assurance Engineer** for our client in the **Lucerne area**.

In this role, you will drive Quality Assurance, ensure compliance with quality and safety standards, and support manufacturing excellence through close collaboration with Engineering and Operations.

Task:

- * Develop and promote Quality Assurance requirements and a strong quality culture
- * Act as main interface for Process Engineering and Operations on quality and safety topics
- * Define and implement Critical-to-Quality (CTQ) characteristics and control plans
- * Supervise Manufacturing, Assembly, Integration and Testing (MAIT) quality aspects
- * Define and monitor Measuring & Test Equipment (M&TE), Measurement System Analysis (MSA), and process capability
- * Perform quality inspections and manage KIP/MIP documentation
- * Establish and maintain process quality documentation and support process qualification
- * Ensure compliance with customer, regulatory, and internal requirements
- * Support product and qualification data packages, especially for space applications

Profil:

- * Relevant experience in Quality Assurance and Continuous Improvement
- * Strong technical understanding and ability to analyze complex systems
- * Hands-on mindset combined with solid theoretical knowledge
