

Deviation Specialist

m/f/d, Wallis

The Deviation Specialist (m/f/d) will be part of a team that is currently established to own and investigate deviations at a large scale mammalian cell culture facility.

You will represent the Operations Unit, taking ownership of Deviations which arise; to investigate the root cause(s), the impact/potential impact on product and/or systems, and to define appropriate CAPA(s) as solutions.

Start Date: Aug 2026

End Date: Jan 2027 (with the option of extension)

Workload: 100%

Location: Visp

Workmodel: Contracting

Your responsibilities

- * Responsible to own, author, record and investigate Deviations
- * Liaise with Subject Matter Experts (SMEs) and key stakeholders to establish the root cause(s) of deviations and the potential impact of said deviations
- * Ensure proper investigational tools are used to systematically define the root cause(s) and contributing factor(s) (e.g., Fault Tree Analysis, Defense Analysis, Event & Causal Factors Chart, Fishbone Diagram, etc.)
- * Contribute to define appropriate CAPA(s), and associated Effectiveness Checks, as solutions to correct deviations and prevent future recurrence
- * Ensure cGMP compliance through the investigation process, and to drive their quality records to completion and timely closure
- * Support the business through ongoing change and process improvement activities

Your Profil:

- * Bachelor degree in chemistry, biotechnology, life science or related field
- * Previous experience in Deviations and cGMP in a regulated pharmaceutical/API industry is a strong advantage
- * Knowledge of biotech. manufacturing processes and analytical methods is an advantage
- * Experience with Human and Organizational Performance & risk management approaches is an advantage
