

MSAT Engineer

Process Management

m/f/d, Zug

We are looking for an **MSAT Engineer** to join the BGE MSAT Process Management team in Rotkreuz. In this role, you will support daily production activities and continuous improvement projects within a highly regulated manufacturing environment.

You will manage compliance-related activities, contribute to deviation investigations and process optimization, and collaborate closely with cross-functional stakeholders including Quality, Logistics, Development, and external suppliers.

This role is ideal for a proactive engineer or scientist who enjoys problem solving, process improvement, and working in a fast-paced, agile, GxP-compliant environment.

Contract duration: 12 months

Your Tasks:

- * Manage **non-conformities, changes, and technical documentation** in SAP across processes, methods, materials, and equipment
- * Support **deviation investigations, root cause analysis, and implementation of corrective actions**
- * Optimize production processes to improve **quality, yield, and cost efficiency**
- * Collaborate with internal departments and external suppliers to ensure reliable product supply
- * Establish, maintain, and continuously improve production **control loops and operational processes**
- * Ensure **audit readiness** and compliance with regulatory, quality, and department requirements

Your Profile:

- * University degree in **Engineering or Natural Sciences** (Biotechnology, Biology, Chemistry, Material Science,
